

NAMI FaithNet is an educational resource for clergy and congregations of all faith traditions who want to establish a welcoming and supportive community for people living with mental illness and their family members.

FaithNet trainings have been successful, in part, because all faith traditions have the basic tenets of providing care and compassion to those in need.

Faith communities are often the first place many people turn to for support. FaithNet helps prepare congregations to be that supportive place people living with mental illness and their family members may need.

Mental Illness Affects Everyone

Mental illness affects nearly 60 million Americans every year.

Regardless of race, age, religion or economic status, mental illness impacts the lives of at least one in four adults and one in 10 children across the United States.

People living with mental illness need help and hope. They need a community that supports them.

Schedule a FaithNet Session

The FaithNet curriculum was developed by NAMI and has been used by affiliates, like NAMI Franklin County, across the U.S.

We have a team of trained FaithNet facilitators who will work with you to prepare your congregation and present the training.
